

**EQUIPMENT SPECIFICATIONS:**

LED TYPE:	SMD
PITCH:	10mm
PIXEL DENSITY:	1936 (44 x 44)
POWER DRAW:	1.7A
CONTRAST RATIO:	1625:1
LIGHT OUTPUT:	2000 nits
WEIGHT:	14kg
VIEWING ANGLE:	145° (H/V)
DIMENSIONS:	448mm x 448mm x 150mm

## Barco I-Lite 10mm Indoor LED

The Barco I-Lite10 LED display module is equipped with the same high-end features & technologies as the I-Lite 6 LED display modules but achieves a resolution of 10 mm and is therefore suited for applications that require bigger indoor LED displays in combination with medium range viewing distances.

With its 10mm resolution, 14-bit processing power, level 2 (LED level) calibration, and enhanced software algorithms, the I-Lite 10mm delivers unbeatable light output, unsurpassed color depth and uniformity. The 14-bit processing power also results in significantly improved greyscales, especially in low light conditions.

Purpose designed for the road, much attention has been paid to the ease of set-up (size, weight of tile), serviceability (OSD, tile swap), and upgradeability. The total rental solution includes new rugged rental structures, sturdy flight cases as well as a powerful, user-friendly processor, which allows you to have your display installed and calibrated in no time.

This product is only rated for indoor use.
