Barco RLM G5i DLP Projector

With its compact design and sealed optics, the RLM G5i Performer is an ideal all-round entry-level DLP projector.

Feature-rich and ready to use, the RLM G5i Performer allows everything from seamless switching to picture-in-picture and offers a bright 5,000 ANSI lumen output. With its sealed optics (prism and DMD's), a dedicated lens range and compatibility with the existing SLM Projector lenses, the RLM G5i Performer becomes the ideal staging or corporate rental projector for mid-range applications.

Another great feature of the Barco RLM G5i is its whisper-quiet operation - making it an ideal rental choice for theatre or broadcast environments where minimising ambient, background noise is essential.
