

EQUIPMENT SPECIFICATIONS:

DIMENSIONS:	595mm x 598mm x 911mm (WxLxD) 699mm x 724mm x 1080mm in r/case (WxLxD)
WEIGHT:	53kg (108kg in r/case)
POWER DRAW:	3.5A
BRIGHTNESS:	5,000 ANSI Lumens
CONTRAST RATIO:	1200:1
DISPLAY TECHNOLOGY:	1.3" LCD w/MLA, 3 LCD panels
PANEL RESOLUTION:	1024 x 768
LENS THROW RATIO:	1.8 - 2.4:1
CAMERA TYPE:	Super HAD CCD sensor technology
CAMERA LENS:	18x optical zoom

DL-2 Digital Projector/Light

DL2 is a "smart" automated lighting fixture featuring a 5000 ANSI LCD projector, a remote control camera and an integrated digital media server in one. This single package hangs and acts like any other automated light.

DL2 also offers a reduction of installation time. There's no need for RGB cabling, and servers are no longer necessary at front-of-house. DL2 resembles an intelligent moving luminaire and controls just as easily—it's a plug-and-play operation using standard DMX cabling and protocols.

DL2 units also feature internal soft edge masking allowing multiple units to form seamless horizontal or vertical blends.
