

EQUIPMENT SPECIFICATIONS:

LED TYPE:	SMD
PITCH:	25mm
PIXEL DENSITY:	256 (16 x 16)
POWER DRAW:	0.5A
LIGHT OUTPUT:	2400 nits
WEIGHT:	1kg
VIEWING ANGLE:	180° (H/V)
DIMENSIONS:	400mm x 400mm x 40mm

Stealth Transparent LED Screen

Stealth LED Screen – the next generation of video production creativity.

The STEALTH™ panel is the building block of an innovative, transparent, large scale video screen solution. The panel's unique design, with its low profile central support and fins, whilst being extremely lightweight, makes the system virtually transparent when the screen is off.

STEALTH is a high resolution display (25mm pixel pitch) that deploys rapidly and folds together for easy stacking and portability. Ideal for both permanent and temporary applications, STEALTH works well in architectural spaces, trade shows, TV stage sets, or concerts.

STEALTH is a modular system composed of individual 400mm panels. An integrated power supply and data routing unit mounts with each screen panel. Processing hardware converts a DVI, HD, SDI, s-video, component, or composite video signal that is routed to the individual panels.

This product is only rated for indoor use.
